☐ None Selected Select one of the data types below.

☐ Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

☐ Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

☐ Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

☐ Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

☒ Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create roll-up summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

☐ External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Allows users to select a True (checked) or False (unchecked) value.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the DateTime field.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that outside email addresses cannot be used for mass emails.

Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

Allows users to enter any number. Leading zeros are removed.

Allows users to enter a percentage number, for example, 10% and automatically adds the percent sign to the number.

Allows users to enter any phone number. Automatically formats it as a phone number.

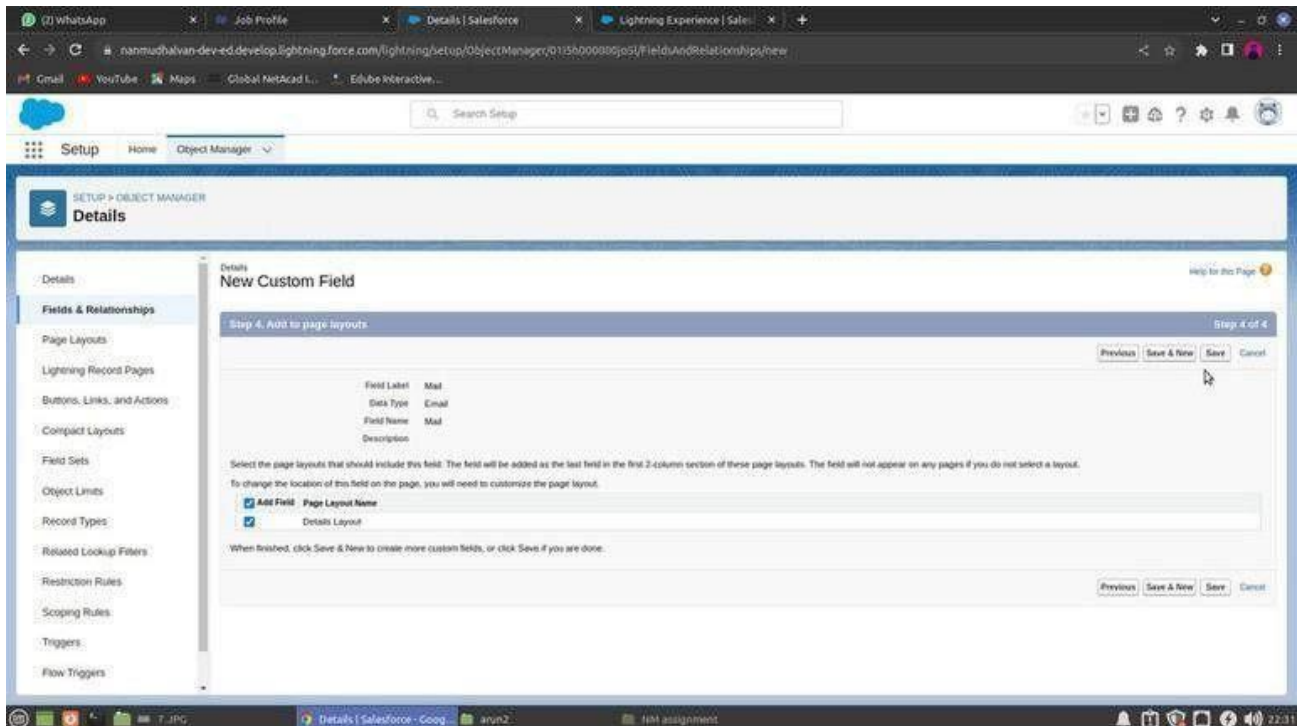

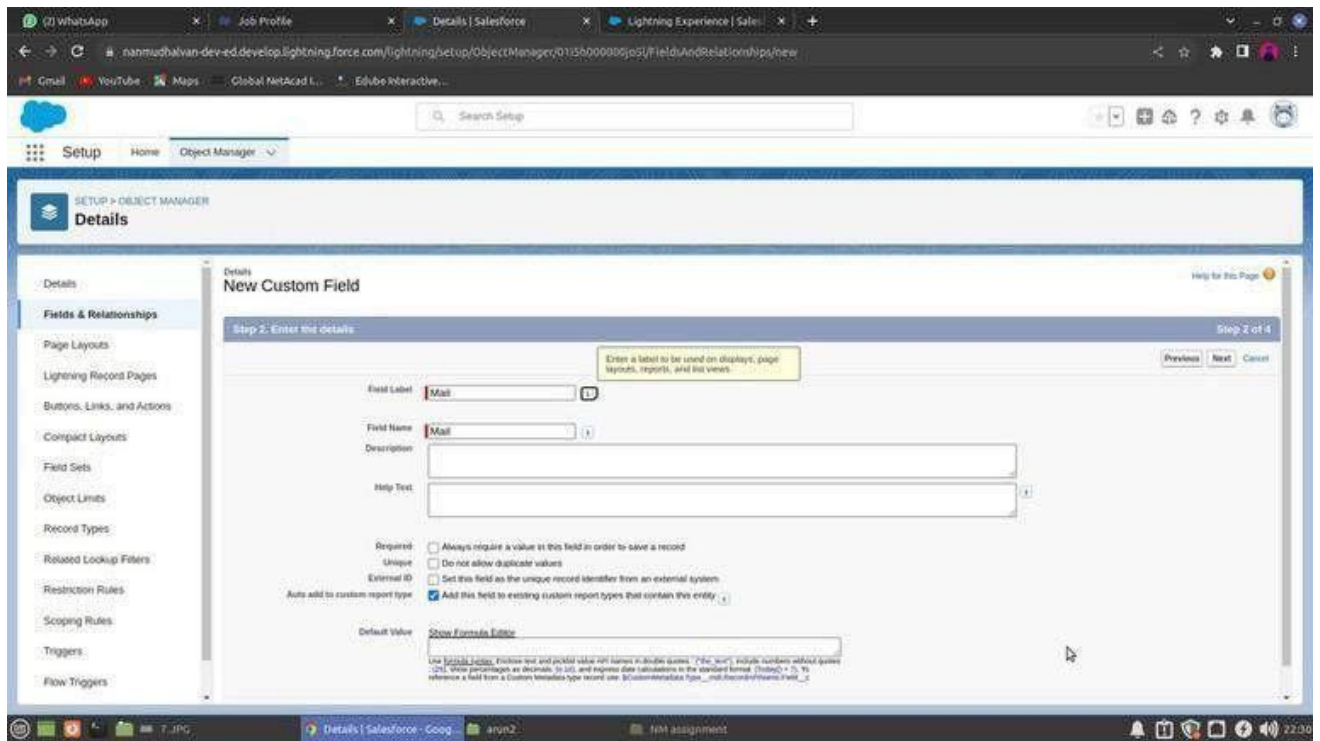

Allows users to select a value from a list you define.

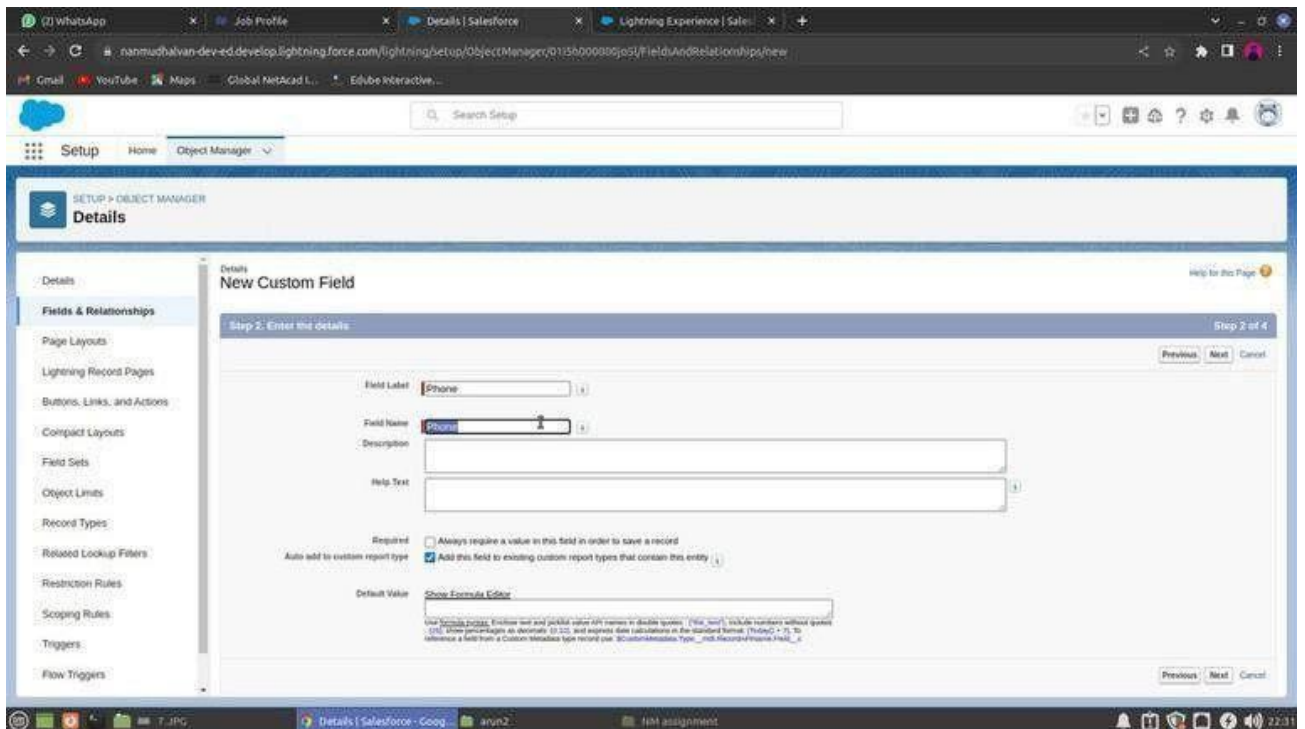

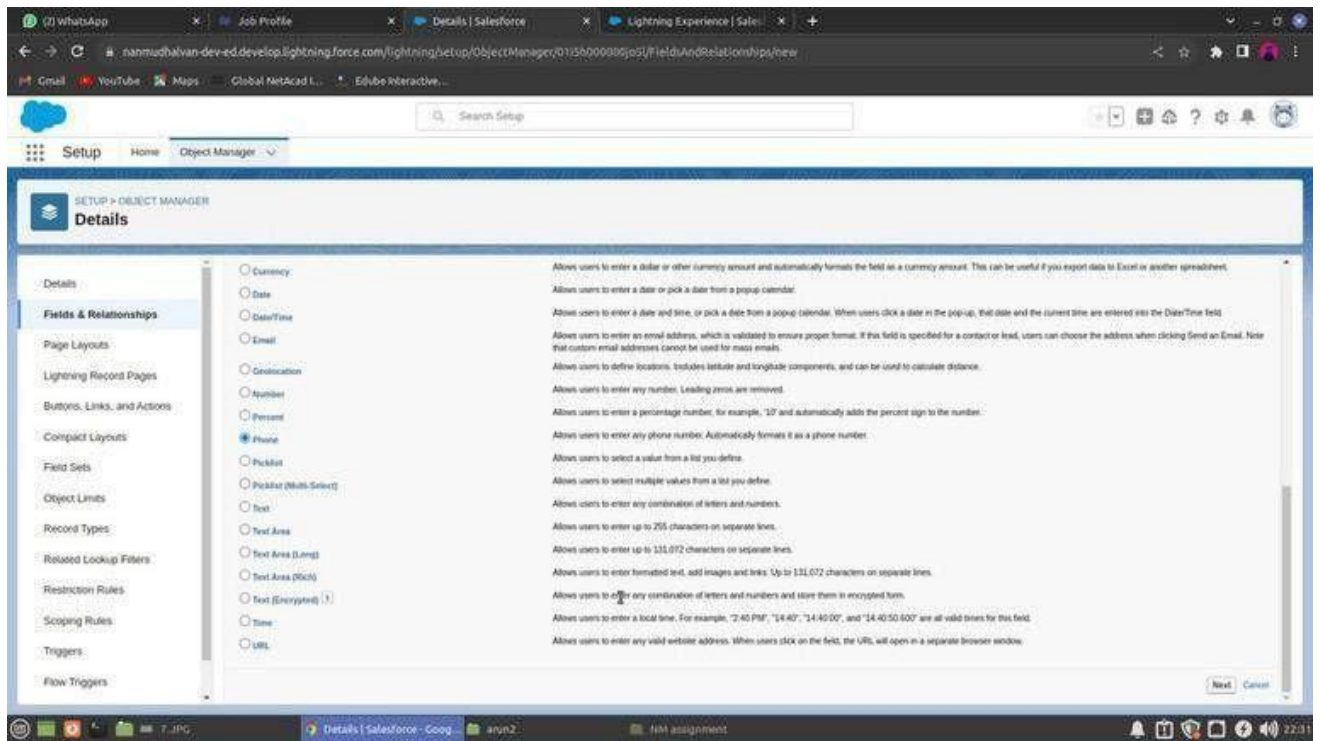

Allows users to select multiple values from a list you define.

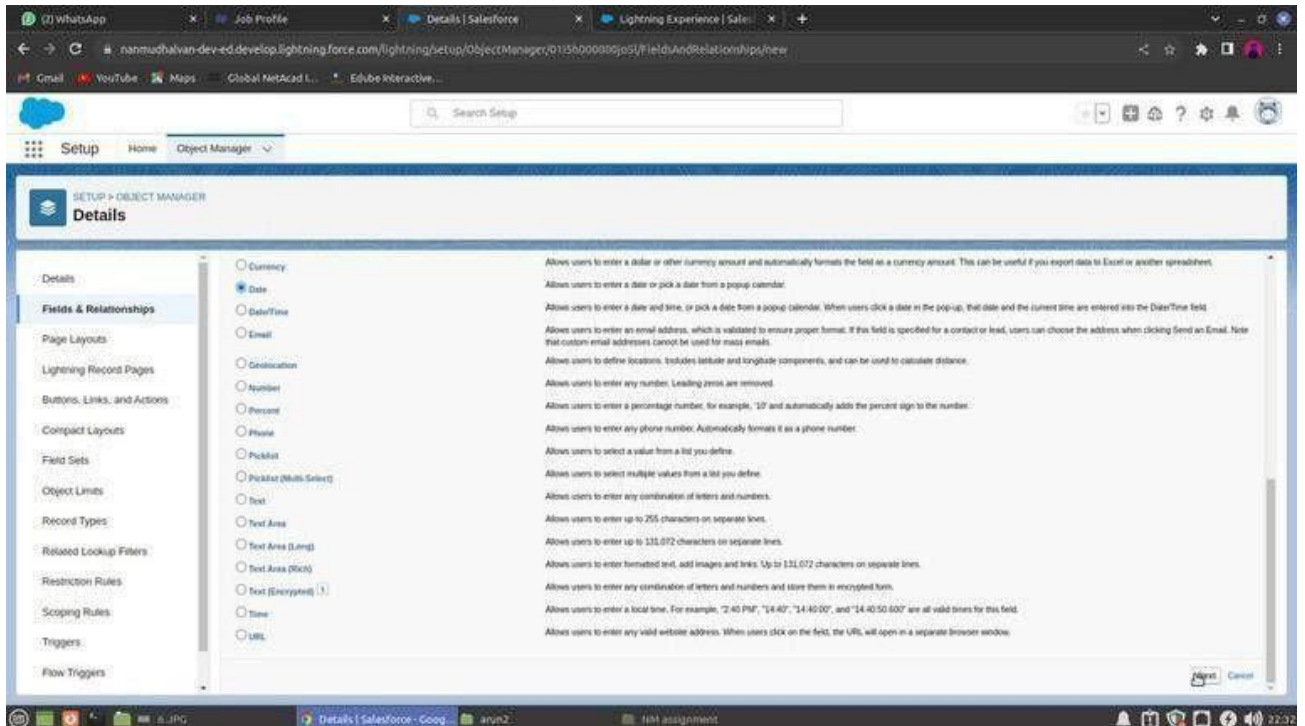

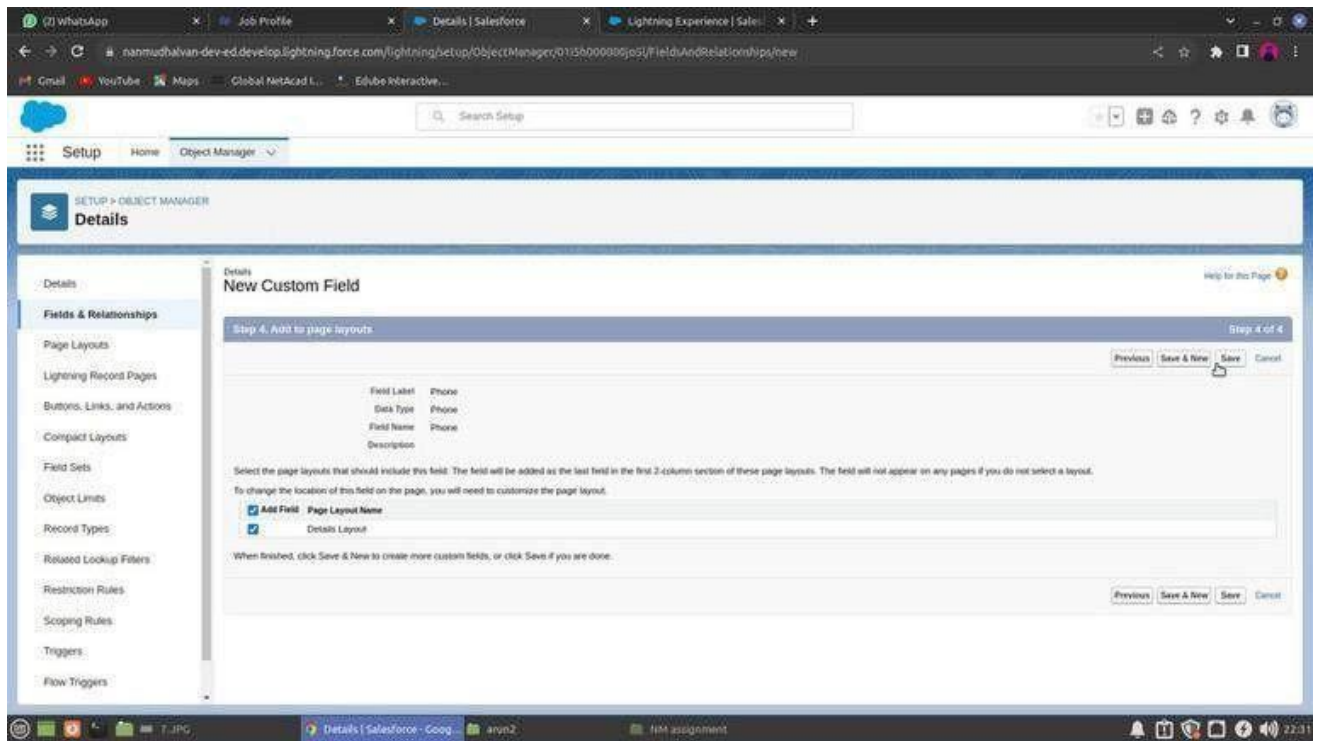

Allows users to enter any combination of letters and numbers.

3. Suppose there are 2 Users and they are having Create, Read, Edit access on Account Object with the same profile but we want to open up the access for one user to delete how will you implement the Security setting.

The screenshot shows the Salesforce 'New Custom Object' setup page. The browser tabs include 'WhatsApp', 'Job Profile', 'New Custom Object | Sales...', and 'Lightning Experience | Sales...'. The address bar shows the URL: 'nanmughalvan-dev-ed.develop.lightning.force.com/lightning/setup/ObjectManager/new'. The page header includes 'Setup', 'Home', and 'Object Manager'. The main content area is titled 'New Custom Object' and contains a 'Custom Object Definition Edit' section. This section includes fields for 'Label', 'Plural Label', 'Starts with vowel sound', 'Object Name', and 'Description'. There are also checkboxes for 'Context-Sensitive Help Setting' and 'Context Name'. A 'Required Information' icon is visible on the right. The bottom of the page shows a taskbar with various application icons and the time '22:43'.
